Professional Summary

Machine Learning Engineer and Data Scientist who builds practical, production-minded AI solutions and predictive models. I am working on InvestWise Predictor (neural-network investment predictor). I developed a hybrid ensemble framework for electricity-theft detection under severe class imbalance, projects that showcase my strengths in neural networks, predictive modeling, and large-scale data handling. I pair strong Python/TensorFlow/PySpark skills with end-to-end pipeline experience (Django, React, PostgreSQL, Redis), relentless problem-solving, and a knack for turning messy data into clear business impact.

Work Experience

Machine Learning Engineer, Danco Analytics, Nairobi County

06/2024 - Present

Focusing on statistical data analysis to enhance operational efficiency.

Data Scientist, Proton, Nairobi County

03/2024 - 06/2024

Utilized Seaborn, SQL, and Python for data analysis and insights, working with machine learning algorithms and deep neural networks.

Senior Information Technology Consultant, Webuye County Hospital, Bungoma County

03/2024 - 06/2024

Developed programs and conducted statistical data analysis.

Data Analyst, Upwork, Nairobi County

08/2023 - 03/2024

Analyzed data to provide insights for decision-making, utilizing statistical techniques and machine learning to extract insights, and created reports and visualizations using Tableau and Power BI.

Data Scientist and ML Engineer, Self-employed Freelancer

02/2023 - 03/2024

Worked on various projects leveraging machine learning and data science techniques.

Machine Learning Engineer, Kingdom Faith-based Hospital, Bungoma County

01/2023 - Present

- Led end-to-end ML solutions for hospital operations and clinical screening, collaborating with clinicians on problem framing.
- Built forecasting models for daily patient inflow and appointment no-shows to optimize staffing rosters and reduce wait times.
- Developed robust data pipelines and ETL processes using PostgreSQL, enforcing data schema and validation rules to protect patient privacy.
- Delivered a patient-inflow forecasting model that improved clinic throughput and reduced average patient wait time.
- Implemented an automated anomaly detector to reduce stockouts and billing errors.
- Trained and mentored junior data staff on model interpretation and safe AI use in clinical settings.

Education

Master's Degree, The Cooperative University Of Kenya, Kenya

09/2024 - 04/2026

Currently pursuing an MSc in Data Science and Machine Learning with a focus on advanced machine learning and statistical methods.

Certificate, Moringa School, Nairobi

04/2023 - 12/2023

Distinction Certificate in Data Science & Machine Learning with relevant coursework in ML pipelines and feature engineering.

BSc, Zetech University Kenya, Ruiru, Kiambu

11/2022

Completed coursework focused on software design, database systems, and applied data analysis.

Courses

Python Data Associate, DataCamp

Data Science Associate, DataCamp

Python Essentials 2 Professional, Cisco

Introduction to Google Workspace Administration, Google Cloud

Foundations: Data, Data, Everywhere, Google

Google Data Analytics Certifications, Coursera

Software Engineer Role Certification Test, HackerRank

Problem Solving (Intermediate), HackerRank

Problem Solving (Basic), HackerRank

Python (Basic), HackerRank

The Non-Technical Skills of Effective Data Scientists, LinkedIn

A Day in the Life of a Data Scientist, LinkedIn

Supply Chain Foundations: Analytics, LinkedIn

Angular Programming, Udemy

JavaScript Certificate, Udemy

Python for Data Science, Udemy

Practical Password Cracking, Udemy

Technical Skills

Programming Languages

Python, SQL, JavaScript

Machine Learning Tools

Seaborn, TensorFlow, Scikit-learn

Data Visualization Tools

Tableau, Power BI

Projects

Energy Theft & Non-Technical Loss Detection from Smart-Meter Logs, Project Metrics

09/2024 - 04/2026

Target metrics achieved: Precision - 95%, Recall - 90%, Score - 90%.

InvestWise Predictor, Investment Recommendation Platform

11/2023

A comprehensive platform that combines AI and ML to deliver deployable investment recommendations.

OSINT Playground, Reconnaissance Tool

A multi-platform username reconnaissance tool with streaming search aggregation and graph visualization.
